AVAILABILITY

AVAILABLE FOR FULL-TIME WORK | Available for full-time software development opportunities from October 2026.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Dart, Java, C, C#, React, React Native, Expo, Flutter, HTML, CSS, Tailwind CSS, Node.js, Express

Backend, Data & Security: Firebase (Auth, Firestore, Storage), Supabase, PostgreSQL, Row-Level Security (RLS), Edge Functions, SQLite, SQL, Pandas, Streamlit, Recharts

Platforms & Tools: .NET / WPF, Git, GitHub, Vite, Electron, Figma, Responsive UI Development, LAN Protocol Design, Agile Team Collaboration, GitLab

PROJECT EXPERIENCE

PulseOps *Personal Project*

- Built an enterprise-style IT incident and operations platform with role-based dashboards, SLA tracking, and audit logging, using Supabase (PostgreSQL, Auth, Realtime, Edge Functions)
- Enforced authorization at the database layer with PostgreSQL Row-Level Security rather than in the UI, and kept privileged credentials server-side via Edge Functions for admin invites and AI-assisted incident triage (Claude API)

TruckNav *Personal Project*

- Built a native truck GPS system: a C# / WPF Windows connector that reads live game telemetry and computes routes, paired over the LAN with a Flutter Android app for real-time navigation
- Designed and hardened the LAN discovery and pairing handshake protocol so the two apps connect securely without cloud services, logins, or manual IP configuration.

Momentum *MSc Coursework Project, COMP702*

- Developed a Flutter habit-building app with Firebase authentication (email, Google, Apple), habit streaks, and adaptive goal suggestions
- Implemented automatic step-sync via Health Connect / Apple HealthKit and covered core sync and habit logic with automated widget and unit tests.

HerCycle *Personal Project*

- Developed a cross-platform mobile health app using React Native and Expo for cycle tracking, symptom logging, weight monitoring, and fertility estimates
- Added Firebase sync, doctor-ready PDF export, nearby medical store lookup, and Android build delivery using EAS.

College Student & Teacher Portal *Personal Project*

- Built a role-based web portal for students, teachers, and admins using React, TypeScript, and Firebase, with real-time Firestore updates and responsive dashboards
- Implemented assignment submission, attendance tracking, announcements, grading, and file uploads across three distinct user roles.

Other projects: HimaTrack: Electron desktop activity tracker for Windows/macOS. UK Census Pipeline: Python data-analysis contribution to an MSc group project. Ecommerce Analytics: Python pipeline for e-commerce data cleaning and visualisation.

EDUCATION

Postgraduate Diploma (PGDip), Advanced Computer Science *September 2026*

University of Liverpool, Liverpool, UK

Bachelor of Computer Application *CGPA: 8.10/10*

Bharati Vidyapeeth, Navi Mumbai, India
